

How it works

With eVisit, getting the care you need is simple. Here's how it works:

1.

Create your eVisit account at <http://app.evisit.com/#/enroll/westview>

2.

Call and schedule your visit [\(918\) 428-5373](tel:(918)428-5373)

3.

Connect with your doctor

4.

Get treatment

Frequently asked questions, answered.

Q: How can my doctor treat me without a physical exam?

A: We actually don't need to do a physical exam to diagnose and treat many conditions. That's because knowing your medical history is considered "90% of the evaluation" when combined with the doctor-patient interaction. How you're feeling can be just as important to us as the results of a physical exam. Plus, being able to see you and view any picture uploads via eVisit gives us the additional visual information needed to make a diagnosis.

Q: Can my doctor prescribe medication?

A: Yes. If it has been decided you need treatment, we will send your prescription electronically to your pharmacy so it's ready to pick-up when you arrive.

Q: What conditions can my doctor treat via the eVisit app?

A: We use the eVisit app to treat and manage a wide range of conditions, from sinus infections to post-operation follow-up care. Check with us to get more information about your conditions that can be treated or if you have other questions.

Q: What conditions cannot be treated via eVisit?

A: If you have a medical emergency, please dial 911 immediately. eVisit shouldn't be used for emergency care.

Q: Is my medical information secure?

A: Yes. The eVisit app is 100% HIPAA compliant, so any personal health information you provide is completely safe and secure.

Q: Do I need any special equipment to use the eVisit app?

A: You do need a few basics: a computer or compatible mobile device (tablet or smartphone), a webcam, and a microphone. If your computer or mobile device already has an integrated camera and microphone, you shouldn't need any extra equipment to get started.

Q: I'm not very tech-savvy. Is eVisit still for me?

A: Yes! The eVisit app was designed to be very user-friendly. Imagine Skype or Facetime, but with a few more bells and whistles to give you and your doctor everything you need to have a successful visit.
